The Honorable Michael Burgess  
United States House of Representatives  
2161 Rayburn House Office Building  
Washington, DC 20515

Dear Senator Bennet, Senator Cassidy, Representative Welch, and Representative Burgess:

On behalf of the undersigned organizations representing diverse national stakeholders who share the goal of supporting small provider practices in the Medicare program who serve beneficiaries in rural locations, health professional shortage areas, and medically underserved areas, we commend you on the introduction of the SURS Extension Act and eagerly express our strong support for the bill. This critical legislation extends an important technical assistance program known as the Quality Payment Program Small Underserved, and Rural Support (QPP-SURS) program, which provides support to practices who participate in Medicare value-based payment initiatives, and we strongly urge its swift passage by Congress.

As you know, the widely bipartisan Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) established the Quality Payment Program and the QPP-SURS program, which provides direct assistance to eligible clinicians required to participate in the Merit-based Incentive Payment System (MIPS). This assistance is critical to ensure that small practices in rural and underserved areas have the support and tools necessary to succeed in the MIPS program. However, after five years of support, QPP-SURS will end February 15, 2022, leaving clinicians without a direct technical assistance program to help them navigate continuously changing regulations in the remaining years and increasing performance thresholds of the QPP despite MIPS continuing until 2027. Removing this critical infrastructure support could further exacerbate disparities in communities already facing limited access to high-quality health care.

In addition, payment reform programs are complex, and clinicians require supplemental resources and guidance to meet the substantial quality and cost containment aspirations of payment models. This is particularly true for small practices that qualify for QPP-SURS. Practices that fail to meet the MIPS performance threshold could be penalized up to nine percent<sup>1</sup> for poor performance, which is a significant financial impact for providers that often serve high-need, high-cost patients in underserved areas. The COVID-19 pandemic has further exacerbated this issue by restricting the availability of these clinicians to understand updates and changes to payment reform programs.

---

**The SURS Extension Act extends the QPP-SURS program until 2027 and ensures that small practices in rural and underserved areas have the support and tools necessary to succeed in the MIPS program.**

Once again, thank you for your leadership in supporting small medical practices across the United States. We look forward to working with you to ensure passage of this critical legislation.

Sincerely,
